GUARANTEED ANALYSIS

Calcium (Ca)6.7%
Magnesium (Mg)0.6%
 0.6% Water Soluble Magnesium (Mg)
Boron (B)0.1%
Derived from: Calcium chloride, Magnesium chloride, boron ethanolamine

DIRECTIONS FOR MIXING: SWEET will readily disperse in water with little agitation. Any residue left in containers is water-soluble. Triple rinse containers and add contents to the spray tank. Do not reuse container. **TANK MIXES:** has shown to be compatible with most pesticides, fertilizers and other chemicals but a compatibility test is always advised as standard operating procedure. An adequate test for compatibility involves mixing in a small container the proper proportions of the intended tank mix products with the intended volume of water. Agitate and let stand for one hour. If a precipitate forms then apply the products separately. Any tank mixes should be discussed and/or approved with your local distributor prior to mixing and application.
