GUARANTEED ANALYSIS

Total Nitrogen (N) 8.0 %
8.0% Urea Nitrogen
Soluble Potash (K₂O) 9.0 %

DERIVED FROM

Urea; potassium acetate.

DRIP/TRICKLE IRRIGATION

The specific injection equipment and irrigation system must be conform to federal, state and local regulations pertaining to the fertilization of plants through irrigation system and should be calibrated accurately prior to any application.

The irrigation system should operate to achieve maximum distribution uniformity to avoid plant injury and/or ineffectiveness. For best results, apply KENDAL NEM toward the end of the irrigation cycle, allowing for sufficient time for the product to be flushed out of the entire irrigation system, before turning off the irrigation water. Flush and clean all parts with water including any pumps, hoses or nozzles after use of the product.
