- **Skin:**
Take off all contaminated clothing. Rinse abundantly with water and soap. Seek medical advice in case of irritation. Wash clothes before reuse.
- **Eye:**
Rinse immediately and abundantly with water for at least 10 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Seek medical advice if the irritation spreads out
- **Ingestion:**
Rinse mouth, give water to drink, induce vomiting. If the subject is unconscious do not induce vomiting. Seek medical advice

Advice:

Who provides the first medical aide must use the individual protection equipment (latex gloves and safety glasses).

6.1 Personal precautions, protective equipment and emergency procedures
- For non-emergency personnel: No action shall be taken involving any personal risk or without suitable training. Wear protective clothes giving a total skin protection, latex gloves and safety glasses. Keep away from the affected area people not involved in the emergency intervention. Ensure adequate ventilation, move people in a safe place. Alert the internal emergency team.
- For emergency responders: Wear protective clothes giving a total skin protection, latex gloves and safety glasses. See protective measures under point 7 and 8. Avoid dust generation. Dusts at sufficient concentrations can form explosive mixtures with air Avoid any accumulation of electrostatic charge which may create a hazardous condition and cause an ignition. Product layer on hot surface might cause glowing or auto-ignition Ensure adequate ventilation, move people in a safe place.
6.2 Environmental precautions: If possible store into a clean container either to reuse or disposal . Avoid waterway and discharging contamination, competent authority must be informed in case of waterway accidental contamination
6.3 Methods and material for containment and cleaning up: Any release should be immediately cleaned up wearing protective clothes(suit, latex gloves and safety glasses).
